DRILL THROUGH AND DRILL DOWN

- Create pie chart for each categorical data wise sales: - In one pie chart we have to show all categorical data by sales using drill through and drill down.

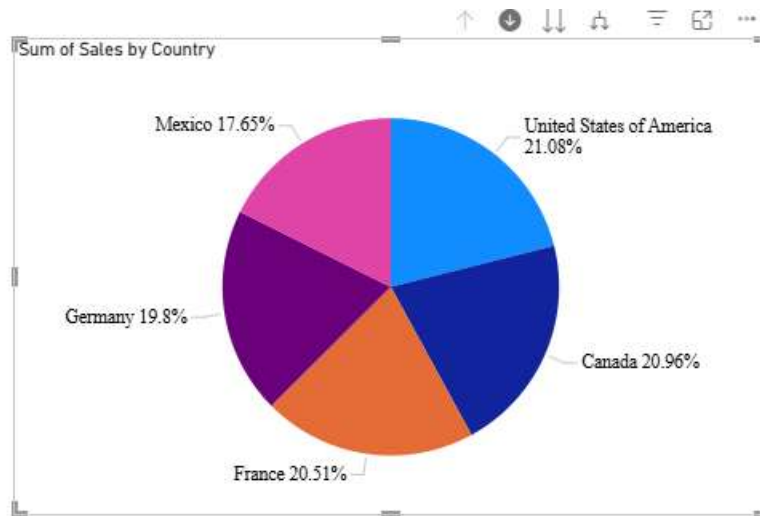

Steps:

1. Select the Visual → Pie Chart
2. Drag and drop the all-categorical field to the **Legend** and drag and drop the sum of sales in to the **Values**.
3. Hide Legend
4. Detail Label → Label Content → Select All detail labels

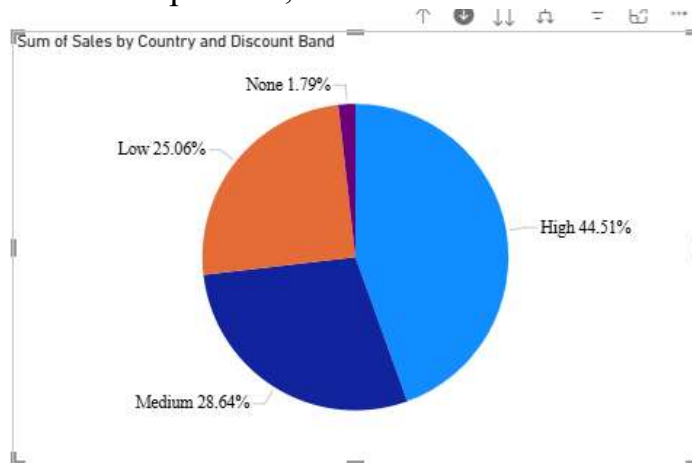

1. **Drill up:** Is used to come back to the first hierarchical category visual.
2. **Drill down:** a feature that allows users to explore data at increasingly granular levels within the same visual by clicking on a data point.
3. **Go to the next level hierarchy:** It will provide next categorical visual.
4. **Expand all down one level in the hierarchy:** For every tap, it will provide all the hierarchical data in one visual

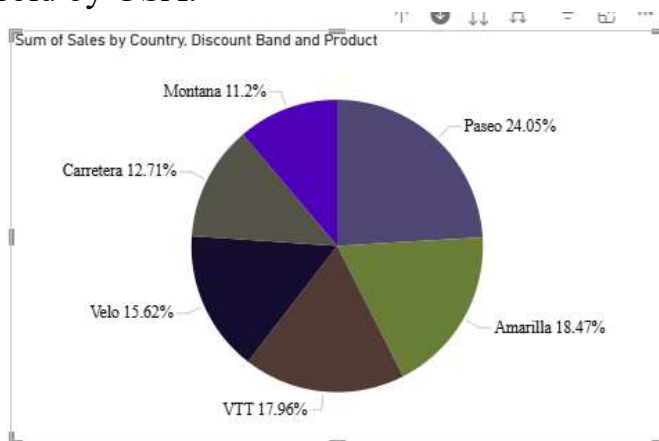

Drill Down:

1. Click on drill down, the select any one state for example: Click USA
2. Then it will provide, all discount band of USA

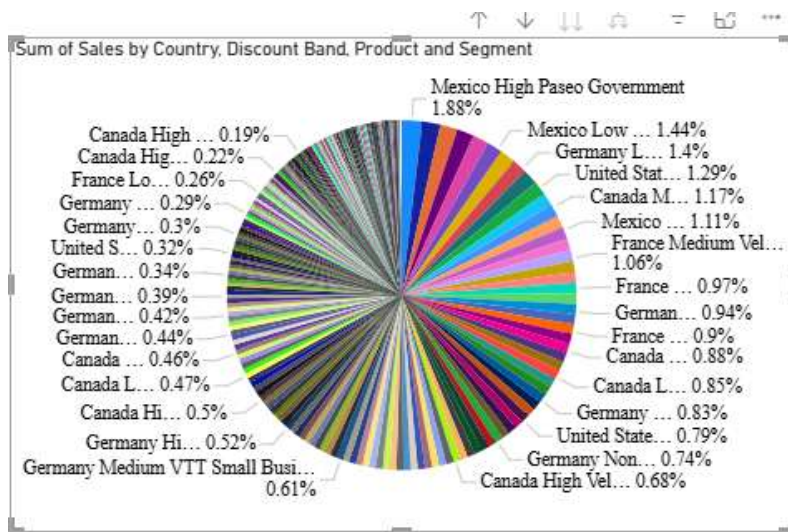

3. Then click on medium slice
4. It will provide, in the medium discount band percentage of the products sold by USA.

5. In the same way hierarchical data will provide.

Expand all down one level in the hierarchy

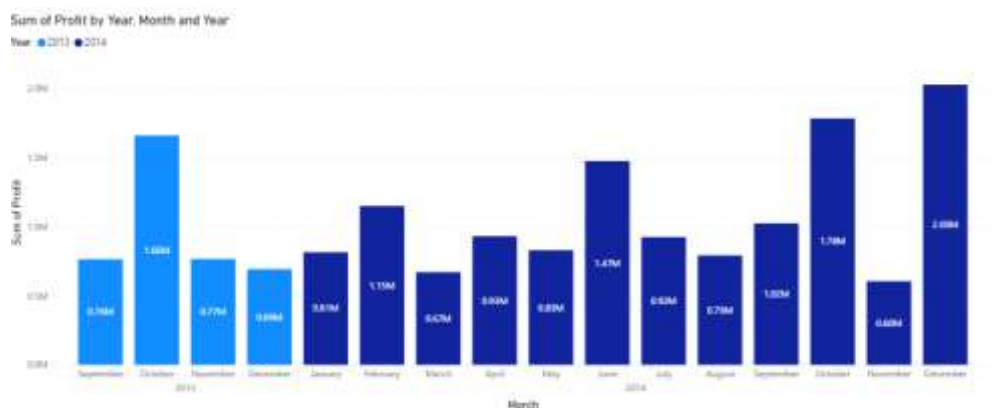

SLICERS

Interactive filters that live directly on a report page, allowing users to filter visuals and see only the data they want.

- Create column chart for year and month wise profit.

Steps:

1. Select column chart, drag and drop the Date in to the X axis, profit in to the Y axis
2. Delete the day and quarter in the x axis
3. Format the font, colour.
4. Drag and drop the year into the Legend
5. Select slicer, add country to it.
6. If you click any country in the slicer, column chart data will change as per country profit.

Country

☐ Canada

☐ France

☐ Germany

☒ Mexico

☐ United States of America

Insights:

1. **Canada has the highest profit in the month of December**, especially in 2014 with a big spike. **2014 performs better overall** than 2013 across most months.
2. **2014 consistently outperformed 2013**, with higher profits in most months. **October 2013 and October/December 2014 are peak months**, showing **France** has strong seasonal spikes.
3. **Germany- October is the strongest month in both years**, with the highest profit spikes (0.60M in 2013 and 0.62M in 2014). **2014 shows higher overall performance**, with more consistent month-to-month profit growth compared to 2013.
4. **Mexico has the highest profit in the month of Jan, June, October and December 2014**, but in **2013 Mexico has lowest profit**.
5. **USA has the highest profit in the month of July 2014**, in 2013 USA has half profit of year **2014 in the month of October**
